

# Flood conditions: Fogera and Dembia floodplains, Ethiopia, August 18 2013

## Legend

-  Flooded
-  Permanent water
-  Not flooded

## Description

This map shows the flooding situation in the Dembia and Fogera floodplains, north and east of Lake Tana, respectively, on August 18 2013. The flood was delineated with the Water Observation and Information System (WOIS) based on RADARSAT-2 satellite data. The flood map is overlaid on the Google Satellite layer.

## Source data

RADARSAT-2 Standard beam mode, HH polarisation, 30 m resolution, acquired on Aug. 18 2013, 15:42 (UTC). The RADARSAT-2 product was provided by Canadian Space Agency through SOAR-AF project 5126.
