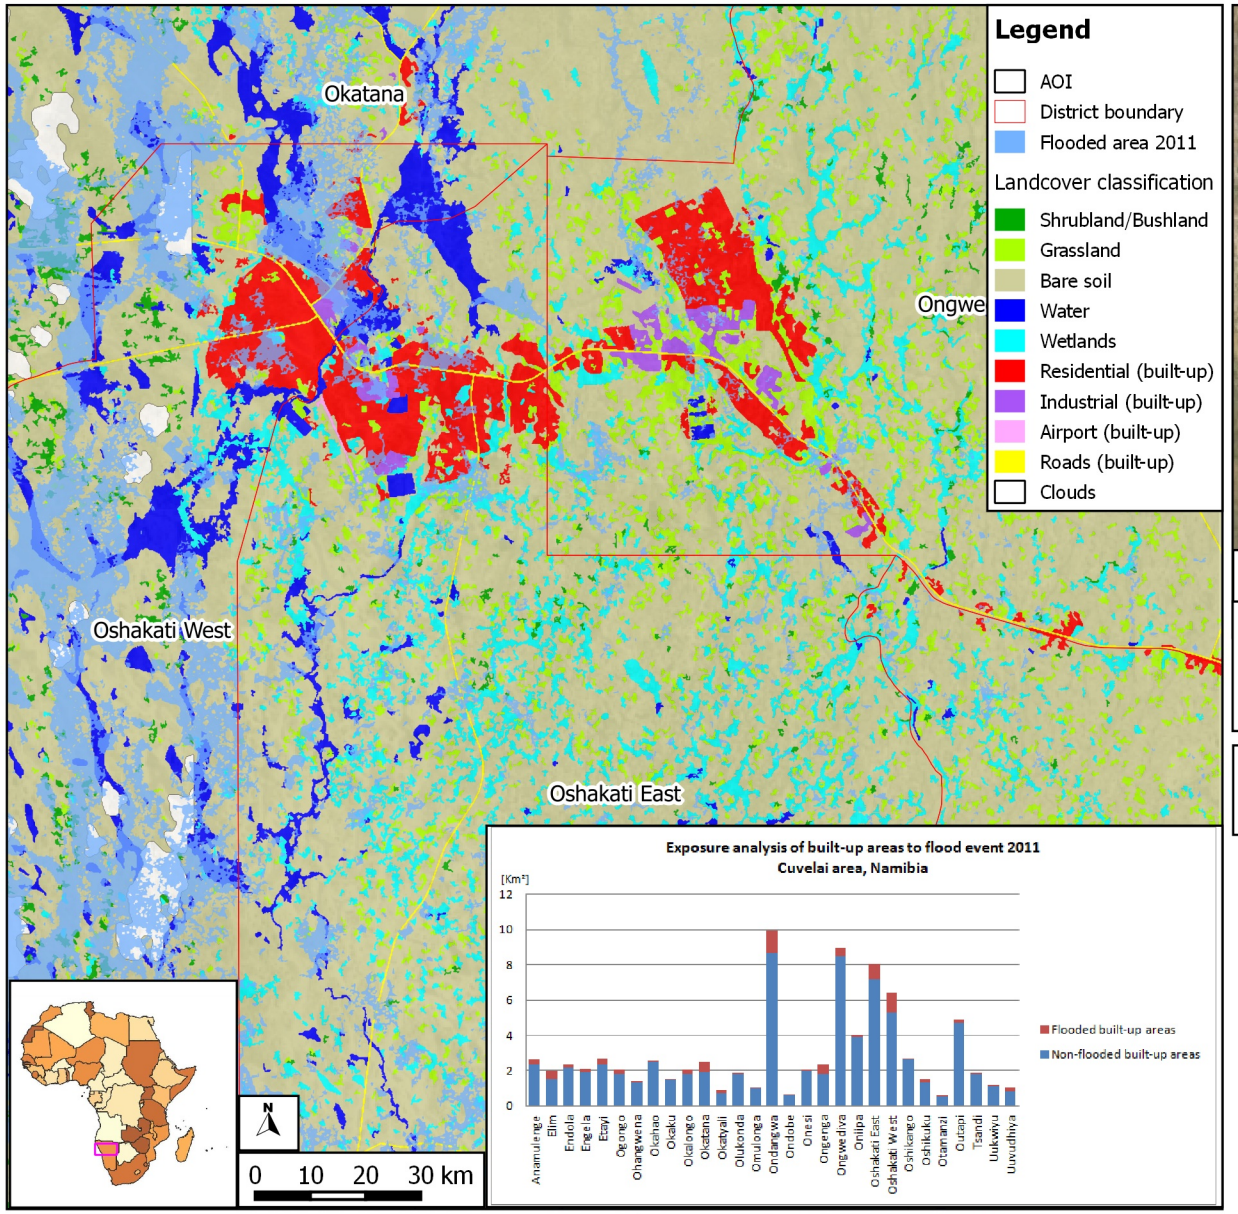
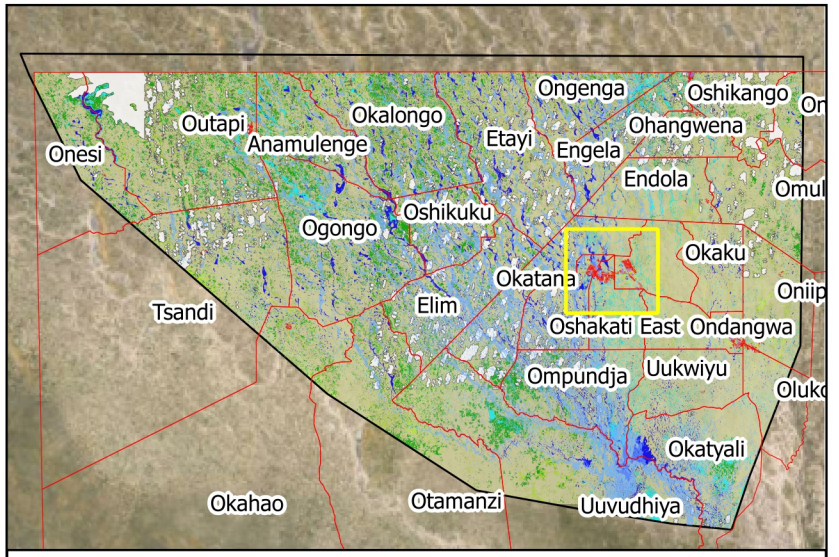
Exposure analysis of built-up areas to flood event 2011
Cuvelai area, Namibia





Description

This map reflects the exposure analysis of built-up areas to the flood event in March 2011 in the Cuvelai area of northern Namibia bordering Angola. The product provides a monitoring service for high-resolution basin characterization at basin level, including a recent land cover inventory and flooded areas from 2011. In the Cuvelai area it serves as a basis for exposure analysis due to flood hazards.
